Description: SSNS Bee Lawn Mix

Seeding Rate: 250 lb/acre (2922.3 seeds/square foot)

Notes: The Bee Lawn Mix is a pollinator friendly, low-maintenance alternative to a traditional lawn mix. The mix contains a blend of fine fescue grasses and flowers that provide essential nectar and pollen for pollinators. It uses less fertilizer and pesticides than a traditional lawn, making it environmentally friendly, grows in both sunny and shady areas, and is very drought-tolerant.

Common Name	Scientific Name	% of Mix	Seeds/ft^2	Total
Grasses				
Creeping Red Fescue	Festuca rubra	24.07%	619.0	6.019 Bulk lb
