Description: BWSR 34-161 Early Successional Floodplain General Mix

Seeding Rate: 33.2 lb/acre (56 seeds/square foot)

Notes: This mix has been designed for areas with floodplains of rivers and streams and full to partial sun. It is commonly used where land is being converted from other uses such as agriculture or non-native grasses. It has relatively low diversity as it is designed for projects where natural colonization of grasses, sedges, forbs and woody vegetation is expected following flooding.

Common Name	Scientific Name	% of Mix	Seeds/ft <sup>2</sup>	Total
<b>Grasses</b>				
Riverbank Wild Rye	<i>Elymus riparius</i>	0.84%	0.3	0.280 PLS lb
